Phase 9: Product Backlog and User Stories

Course Code: 20CYS401 | **Project**: Online Book Review and Recommendation Platform

9.1 Product Backlog (10 User Stories across 2 Sprints)

Story ID	User Story Title	As a / I want / So that	Priority	Story Points	Sprint	Status
US-01	User Registration & Login	As a reader, I want to securely register and log in, so that my account and personal data remain protected.	High	5	Sprint 1	DONE
US-02	Book Discovery & Search	As a reader, I want to search books by title, author, and genre, so that I can quickly discover new reading material.	High	5	Sprint 1	DONE
US-03	Book Details & Ratings Display	As a reader, I want to view detailed book information and aggregated community ratings, so that I can decide whether to read it.	High	3	Sprint 1	DONE
US-04	Submit Rating & Review	As a reader, I want to rate (1-5 stars) and write a review for a book, so that I can share my opinion with others.	High	5	Sprint 1	DONE
US-05	Edit & Delete Own Reviews	As an author of a review, I want to modify or remove my review, while preventing other users from altering it.	Critical	8	Sprint 2	DONE
US-06	Personal Reading List Shelf	As a reader, I want to maintain a private reading list (want-to-read, reading, finished), so that I can track my personal progress.	Medium	5	Sprint 2	DONE
US-07	Admin Catalog Management	As an administrator, I want to add, edit, and delete books in the catalog, so that the collection stays accurate and up-to-date.	High	5	Sprint 2	DONE
US-08	Review Moderation	As an administrator, I want to moderate and hide inappropriate reviews with documented reasons, so that the platform stays safe.	High	5	Sprint 2	DONE
US-09	Security Audit Logging	As a security officer, I want all sensitive authentication and moderation events	High	5	Sprint 2	DONE

Story ID	User Story Title	As a / I want / So that	Priority	Story Points	Sprint	Status
		logged immutably, so that actions are traceable.				
US-10	Secure Containerization & Health Probes	As a DevSecOps engineer, I want the application packaged in a hardened Docker container with health probes, so that it runs securely.	Medium	3	Sprint 2	DONE

9.2 Acceptance Criteria per User Story

US-05: Edit & Delete Own Reviews (Security Focus)

- **Given** an authenticated user who authored Review X,
- **When** the user sends a valid update or delete request for Review X,
- **Then** the system successfully applies the changes and updates the database.
- **Given** an authenticated user who did NOT author Review X (or an unauthenticated user),
- **When** the user attempts an update or delete request targeting Review X,
- **Then** the request is rejected with access denied, an audit event is logged, and the database record remains intact.
